

Terrapin Wetsuits Sizing Guidelines for Hoods & Minihoods

We've found there's a good correlation between the standard sizes of Terrapin Minihoods to height and weight ranges of MOST customers. This is more reliable than hat size, because the hoods also have to accommodate the sides of the face, height of the head, and girth of the neck.

- Small:** children and petite ladies under 5'1" and under 110 #
- Medium:** teens and adults 5'2" – 5'8" and between 115 – 160 #
- Large:** Ladies above 5'8" and 165#, Men up to 6'2" and 195#
- Extra Large:** Men above 6'3" and over 200 #

If you feel the above guidelines don't work for your size/shape head, or if you're not sure which size to order, you can check your head measurements against the table below. For Coldwater Hoods and Dry Suit Hoods, measure all 5 places shown on the drawing to the right. For Minihoods, all we need is measurement #5. The table below shows the measurement ranges for our standard size hoods and minihoods. If your measurements fall outside these ranges, we can make a custom hood or minihood to conform to your measurements.

Size	#5: Head circumference	#1: Distance Front-Back	#3: Neck
Small	20 3/4" – 21 1/2"	16 3/4"	14 1/2"
Medium	21 5/8" – 22 1/2"	17 1/2"	15 1/2"
Large	22 3/4" – 23 3/4"	18 1/4"	16 1/2"
Extra Large	24" – 25"	19 1/4"	18"
